**Personalise learning experience,
succeed in your way**

About Edvantage Institute Australia (EIA)

Edvantage Institute Australia (EIA) is a leading global education provider with a frontier spirit empowering people to realise their potential. We ensure our graduates are career and life ready with up-to-date knowledge and skills they need to be competitive in a global context. We are part of the international education group, Edvantage Group Holdings Limited, listed on the Hong Kong stock exchange.

As a TEQSA registered private higher education provider delivering premier higher education programs in Melbourne, we offer dynamic bachelor programs for local and international students.

At our state-of-the-art campus located at the corner of Queen and La Trobe Streets, Melbourne CBD, EIA students learn the latest theoretical knowledge combined with extensive industry practices and experience. This ensures that our graduates are job ready and career focused, and contribute positively to their social and commercial environments.

WHY STUDY with EIA

Unique features

Modern curriculum and align with industry accreditation

The modern curriculum provides you with theoretical and practical knowledge to get ready for the future of business. EIA's courses are designed to meet the accreditation requirements of the relevant Australian professional bodies.

Cross-sectoral learning and in-demand skills for future work

The courses are designed to focus on cross-sectoral and hybrid skills demanded by the future global job market. You may curate your electives from other higher education courses offered at EIA to your desired specialization or broaden your skillset in business.

Inspired faculty

Our faculty combines industry-leading practitioners and academics. Guest practitioners bring industry experience into the classroom. The industry mentors provide you with real-world insights and individual guidance.

Personalised learning experience

Our smaller class for you to easily access all learning activities. We offer ultimate support and a flexible learning approach for your personal journey.

Multiple pathways to quality employment

You will work on live business projects with industry mentors to apply your skills and exposure to real business challenges. We offer multiple pathways to quality employment through practical curriculum, career coaching, scholarships and industry connections to incubate your ideas and foster a spirit of innovation.

Unbeatable location

Located in the centre of Melbourne, Melbourne's inner-city atmosphere is fueled by a creative culturally diverse community that will make you feel secure and welcome together with learning experiences both on and off campus.

Bachelor of Information Technology (ICT Security)

Brief introduction

Cyber security professionals are required in colossal numbers all throughout the industry. A new breed of the cyber security professional who can combine digital forensics and incident response with privacy preservation and data security policy is being demanded by employers. Our dedicated Bachelor of Information Technology (ICT Security) has been developed with industry standards to deliver these expectations from the industry, including satisfying their programming requirements. This course caters to developing in demand skills aligned with industry best practices. Learn from our experienced professionals to excite, motivate, engage and prepare you tailor made for the requirement of the ever-changing IT and ITES industry.

Career outcomes

Possible placements after completion of this course include

- Ethical hacker
- Cryptanalyst
- Security architect
- Cyber security policy adviser
- Software developer.

Bachelor of Information Technology (ICT Security)

COURSE ID	CRS1401212	AQF	7
CRICOS CODE	109152A	Duration	3 years in 6 regular trimesters
Mode of Study	On campus or online	Annual Tuition Fees	International \$19,000 / Domestic \$13,000
Delivery location	338 Queen St, Melbourne VIC 3000	Intake	January, May, September

Course structure

Students enrolled in the Bachelor of Information Technology are required to complete 24 units of study (comprising 8 core units, 10 major units, & 6 elective units) within a typical study period of 3 years or six academic trimester.

Core Units

Unit Code	Unit Title
BIT101	Computer Systems Fundamentals
BIT102	Database Systems Fundamentals
BIT103	Programming Fundamentals
BIT104	Networking Fundamentals
BIT105	Requirements Elicitation and Analysis
